

AP Statistics Summer Package

First of all, welcome to AP Statistics!! I want to give you a brief description of the course.

1. You should expect to read and digest 60 pages per week.
2. This course has a HUGE amount of writing in it. Expect to write paragraphs on quizzes and tests.
3. The second half of the year is hypothesis testing. This requires you to follow the scientific method and basically write little baby science papers for homework, quizzes and tests.
4. The actual math in this course is not difficult (at an Algebra II level), but most of the contents of this course are word problems.

Having said all that, Please do the following over the summer.

- Read Ch 1
- Read Ch 2
On page 16 please do the following exercises for chapter 2
1,3,5,11,13,15,21,23,25
- Read Ch 3
On page 36 please do the following exercises for chapter 3
1,3,5,11,13,15,21,23,25,31,33,35

Summer packets are due on the first day of class. All work must be shown. Please be neat. We will briefly review this material and you will be given a test on this material during the first week of school. The summer packet will count 50% of your test grade.

Grading Rubric for the summer packet

| | |
|--------------|----|
| Completeness | 30 |
| Neatness | 10 |
| Accuracy | 20 |
| Total | 50 |
